What's iTrack?

iTrack is the ultimate tool for remotely monitoring your irrigation pivots or linears for smart irrigation without having to change your current electrical panel or make costly investments.

It allows you to follow the operation of your pivot 24/7 from any computer, tablet or mobile phone using a web browser.

iTrack is fully compatible with the iControlRemote web application, allowing seamless integration and enhanced functionality for remote monitoring and control.

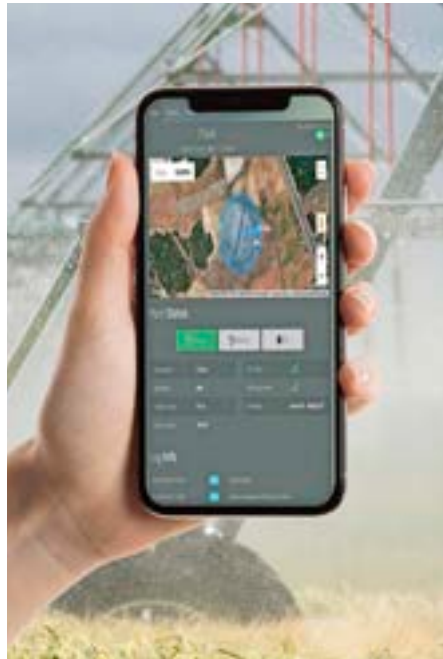

What are the benefits of using iTrack?

- Compatible with all electric pivot and linear brands.
- No need to change the exiting control panel.
- Plug & play.
- Provide real-time alerts for pivot activity and issues.
- Compatible with all iControl products.
- Easy and intuitive application.

When to use iTrack?

iTrack provides with valuable information, helping to make the right decision at all times. If the pivot stops, or there is an unexpected loss of pressure, an alert will be sent to your phone and/or email.

Economic and quick installation, with no need for any special technical knowledge.

Features:

iTrack keeps constantly informed on the following topics of the system's operation:

- Linear Position (GPS based)
- Operation status:
 - Stopped/running
 - Rotation direction (clockwise/anti-clockwise)
- Speed
- Detailed record of the actions performed.
- Alarms (SMS/email)
- Water Pressure
- Hour counter
